City of Dayton Has Notified Residents of Potential PFAS Contamination in Drinking Water

Key Message: While PFAS levels are currently well below the federal health advisory level, the city has concerns that the contamination will continue to migrate from the Wright Patterson Air Force Base into the community's drinking water source.

Dayton's Department of Water sent a notification to all municipal water customers stressing that the water is currently safe, but that the city, Ohio EPA and U.S. EPA are monitoring the situation closely. The air force base is a federal facility Superfund site being cleaned up by the Air Force. Significant press interest is expected.
